

# CHEMICAL DELIVERY SYSTEMS

## Features and Benefits

- High capacity of chemicals
- Multiple equipment supplying
- Remote control & supervision
- Savings on chemicals' cost
- Safe alternative to manual filling
- Elimination of possible contamination
- Reliable operation
- User-friendly HMI interface

## Configuration

- Touchscreen LCD display
- up to 200 l barrel
- PLC controller
- PFA high purity pneumatic operated valve
- No metal contamination
- Up to 4 various equipment

## Optionals

- Computer network support
- SECSII/GEM support
- Various sizes and pump performance
- SMS Notifications
- Remote control by Android / iOS Smartphone

## CHEMICAL DELIVERY

System for automatic distribution of pure chemicals in semiconductor industry. Can be used for all types of chemicals used in semiconductor industry.

- For all types of chemicals
- 4 independent outputs
- Highly Reliable Pump
- Up to 200 liter barrels
- Touch Operator Panel
- Remote Control
- GSM for SMS Notifications
